Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

CLAIMS PRESENTED

Claims 1-14 are presented.

CLAIM REJECTIONS

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-14 are rejected under 35 U.S.C. 103(a) as being unpatentable over EP 0822555A (cited by Applicant, inventor: Kobayashi et al.).

Regarding claim 1, Kobayashi teaches "An information recording apparatus for scrambling digital data broken up into predetermined reference units, and recording the scrambled data on a recording medium, comprising: a scramble ... scrambling digital data for each predetermined reference unit using a randomly generated scramble pattern; and a recording controller recording scramble pattern information for specifying the scramble pattern used in scrambling by said scramble ... on the recording medium (page 2, line 13 to page 3, line 23; page 19, line 45 to page 23, line 57; figures 8-19 – e.g., scrambler 101)."

These passages of Kobayashi do not teach "processor" in the sense of the claim.

Nevertheless, it was well known in the art to have a "processor" situation among information apparatus for the motivation of having easier control of flow of data.

Hence, it would have been obvious to those of ordinary skill in the art at the time of the claimed invention to modify Kobayashi for the motivation noted in the previous paragraphs so as to teach the claimed invention.

Regarding claim 2 (appending data, etc.), such particular features are well known in the art for the purpose of handling information across computers.

Regarding claim 3-5 (recording and writing at various locations, etc.), such particular features are well known in the art for the purpose of handling information across computers. Regarding claims 6-14, such particular features are well known in the art for the purpose of handling information across computers.

Conclusion

The art made of record and not relied upon is considered pertinent to applicant's disclosure. The art disclosed general background.
